DETAILED ACTION

1. The proposed After Final amendment would be entered upon submisssion of an Appeal Brief. Claims 12 and 16-18 would remain rejected under their current grounds.

Response to Arguments

2. Applicant's arguments filed 6/2/2005 have been fully considered but they are not persuasive.

Applicant's arguments that the examples show unexpected results are unconvincing because they are not commensurate in scope with the claims, which are not limited to the particular structure, including layer thicknesses and materials, of the EL devices formed.

Applicant argues that '711 is not for intaglio printing. The argument is unconvincing because '252 explicitly cites '711 for its teachings regarding viscosity [0020]. Therefore, it would have been obvious to one of ordinary skill in the art practicing the process of '252 to have looked to '711 for its teachings regarding viscosity because '252 instructs those of ordinary skill in the art to do so.

Applicant argues that '252 and '397 do not teach covering the coated part with a film. The argument is incorrect because a screen printing screen is a thin covering (i.e., a film).

Applicant argues that '298 refers to a color filter which involves different technical issues than forming an EL device. The argument is unconvincing one of ordinary skill in the art of producing different colored pixels would have recognized the technique of '298 to avoid mixing different colors of pixels to have applied regardless of the way in which the different colors function.
